FREEDOM FROM RUNNING OUT OF POWER!

Be on the road all day and stay in touch with the Parrot *Bluetooth*® DRIVER HEADSET

- Avoid being out of touch when on the road with Parrot's innovative *Bluetooth* earpiece complete with in-car charger
- Removes the need to constantly wear an earpiece making long journeys more comfortable

Designed primarily for in-car use, the new *Bluetooth* Parrot DRIVER HEADSET provides motorists with a reliable solution that is always on and always fully charged. Unlike conventional headsets, the Parrot device comes with an integral charging cradle, which means it stays on charge unless being used. And because the charging cradle beeps to alert the driver of an incoming call, there's no need to wear the earpiece all the time.

It's also one of the lightest available at a mere 14 grams so when you are using it is one of the most comfortable to wear.

To answer a call, simply lift the headset off the cradle, place it in the ear and talk. To hang-up, just put it back in its cradle. The Parrot DRIVER HEADSET can also be used to make outgoing calls when used with a mobile featuring voice dialing, without having to pick up your phone.

"The Parrot DRIVER HEADSET was created to meet demand for an earpiece that will remain charged and doesn't have to be worn constantly," said Parrot's founder and

CEO Henri Seydoux. "Currently drivers have to wear their headset all the time and many run out of power within two to three hours.

The Parrot DRIVER HEADSET charges in its 12-volt cradle so it's always ready to go when needed. When out of the car the battery will last for up to four hours."

The Parrot DRIVER HEADSET will be available in stores in summer 2006 from major retailers at a recommended retail price of £39.99.

Benefits of the Parrot DRIVER HEADSET include:

- Hands-free wireless technology to make and take calls
- Universally compatible with any *Bluetooth* handset and any car
- Constantly self-charges while plugged into cigarette lighter
- Comfortable adjustable ear piece
- Ultra-light headset, weighs just 14 grams

Parrot, "We Put *Bluetooth* in Your Life"

A member of Bluetooth SIG since June 2000, Parrot (www.parrot.biz) is a leader in *Bluetooth* mobile phone accessories with over 1.5 million products sold. The company has developed a deep know-how in voice recognition, and digital signal processing both in hardware and software. Parrot's ambition is to become the natural extension of mobile phones in three key areas: hands-free communication, audio streaming, and digital photos.

Founded in 1994 by Henri Seydoux, Parrot is a global company headquartered in Paris with offices in Germany, Italy, Spain, US and Hong Kong/China and the UK offices in Birmingham. Parrot products are sold online and through retail stores in more than 40 countries.

Parrot and the Parrot logo are trade marks of SA. The "Bluetooth" word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Parrot is under license. Other trademarks and trade names are those of their respective owners.
