

PARROT®

***Undisputed leader in Spain
with a 50% market share***

Paris, France (December 18th, 2006) - Parrot, the *Bluetooth®* mobile phone device specialist, is pleased to be able to confirm its position as the handsfree kit market leader in Spain.

Indeed, a six-month review carried out by GFK from January to June 2006 shows that 50.3% of the handsfree kits sold in Spain are Parrot® brand devices.

GFK's marketing research also confirmed the strong preference for wireless *Bluetooth®* products among consumers, with 90.7% of handsfree kits sold, all brands combined, using *Bluetooth* technology.

Lastly, the top 10 handsfree kits sold in Spain include four Parrot products: the Parrot CK3000, the Parrot CK3000 Evolution, the Parrot CK3100 and the Parrot CK3200.

These results confirm the success of the marketing strategy developed in Spain, as well as the Group's policy to duplicate this model across Europe and in the US.

About PARROT

Founded in 1994, Parrot has rapidly established itself as a pivotal global player for wireless mobile telephone accessories. Drawing on its tried-and-tested expertise on voice recognition and signal processing technologies, Parrot was one of the very first companies to produce *Bluetooth®*-based wireless hands free car kits, having identified this standard's vast potential as early as 1999. In the first half of 2006, Parrot sold more than 1 million units.

Determined to accompany the mobile telephone's irresistible breakthrough into our day-to-day lives, Parrot has developed two new products in 2006: the Parrot Photo Viewer, an LCD photo frame designed to display photos transmitted from a mobile telephone via *Bluetooth*, and the Parrot Sound System, a wireless hi-fi system with speakers linked up to one another using *Bluetooth*.

Today, Parrot truly has a major international focus: 87% of its sales are generated outside of France, and a large percentage of its production is outsourced to carefully selected partners, enabling it to achieve the best possible level of quality and responsiveness. Parrot is now particularly well positioned to capitalize on the bright future opening up for mobile telephone devices.

Parrot has achieved strong growth in its consolidated revenues, up from 80.9 million euros pro forma in 2005 to 116.4 million euros in the first 9 months of 2006.
